Innovate For Healthy Life

ANGEL NUTRITECH

WOMEN & PREGNANCY

SUPPLEMENT

The world famous DOHaD theory points out that the maternal and infant nutrition in the first 1000 days of life (from pregnancy to 2 years of age) will affect the life health. For pregnant women, the supplementation of folic acid 3 months before pregnancy can prevent the fetal neural tube malformation. In summary, the women have the increased requirement for energy, protein, calcium, iron, iodine, folic acid during pregnancy. Scientific and rational maternal nutrition is the prerequisite for healthy life.

According to the nutritional requirements of pregnancy, Angel-Nutritech comprehensively considers the common symptoms during pregnancy, develop a series of products and solutions in order to protect the health of pregnant mother.

No	Product name	Form	Key benefits
1	Vitamin A&D	Softgel	Nutrition supplement, Vision Health
2	Grape Seed & Vitamin E	Softgel	Anti-oxidation
3	Vitamin C&E	Softgel	Nutrition supplement, Anti-oxidation
4	Natural Vitamin E	Softgel	Nutrition supplement, Anti-oxidation
5	Multi-vitamins & Minerals (Prenatal)	Tablet	Nutrition supplement
6	Iron & Folic Acid (Prenatal)	Tablet	Nutrition supplement
7	Acerola Cherry Vitamin C	Tablet	Nutrition supplement, Immune boost
8	Probiotics (Prenatal)	Powder	Preventing reproductive tract infections
9	Yeast Protein (Prenatal)	Powder	Immune boost
10	L-Carnitine & Dietary Fiber	Powder	Slimming, anti-constipation
11	Collagen	Powder	Skin health

Vitamin A&D Softgel

- **Targeting groups:**

1. Lack of vitamin A can lead to night blindness, dry eye disease, diarrhea, anemia, visual disorders, and damage to epithelial mucosa cells, especially the respiratory mucosa;
2. Lack of vitamin A can lead to Rickets;
3. Children aged 1-10;

● Functions

1. Helping visual development;
2. Promoting calcium absorption;
3. Maintaining epithelial mucosal health.

● Advantages

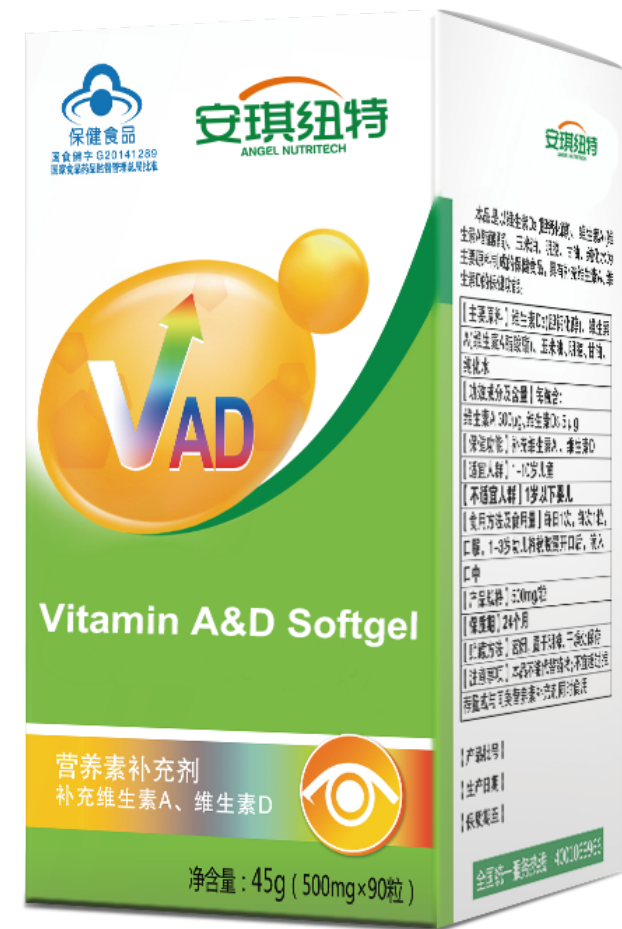

Scientific formulation, reasonable dosage, safer than drugs, suitable for long-term consumption.

● How to use

Take 1 soft capsule per day. After meals, unscrew or cut the drip.

● Specification

0.5g * 90 Softgels/Bottle.

Grape seed & Vitamin E Softgel

- **Targeting groups:**

1. Middle-aged women's common skin oxidative damage, resulting in chloasma, dark skin;
2. Middle-aged and elderly common oxidative damage caused by aging, skin relaxation;
3. Women, middle-aged and elderly people.

● Functions

1. Antioxidant;
2. Enhance immunity;
3. Anti-aging.

● Advantages

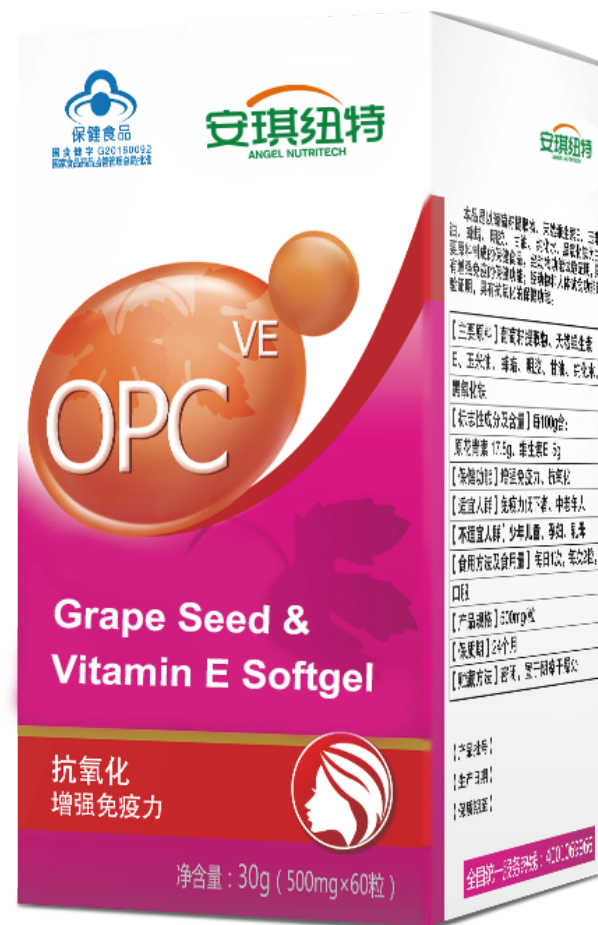

1. 500 mg capsule design, easy to swallow, 2 softgels per day;
2. The daily supply of 175 mg OPC and 50 mg natural vitamin E is effective dose.

● How to use

Take 2 softgels once a day, oral administration.

● Specification

0.5g * 60 Softgels/Bottle.

Vitamin C&E Softgel

- **Targeting groups:**

1. Chloasma;
2. Pigmentation;
3. Sunburn;
4. Freckles.

- **Functions**

Vitamin C and E supplementation.

- **Advantages**

1. Vitamin E comes from BASF, Germany;
2. Vitamin C and vitamin E have synergistic effects on antioxidant and free radical scavenging.

- **How to use**

Take 1 softgel per day.

- **Specification**

1g*60 Softgels/Box.

Natural Vitamin E Softgel

● Targeting groups:

1. Dry skin, aging, spots;
2. Bifurcation;
3. Dysmenorrhea;
4. Infertility and infertility;
5. People who need vitamin E supplementation, Pregnancy preparation women, beauty lovers.

● Functions

Vitamin E supplementation.

● Advantages

1. Import of Natural Vitamin E Raw Materials;
2. High content, up to 100mg d- α tocopherol per grain;
3. Small granules, easy to swallow.

● Suggestions

Take 1 softgel per day, swallow in warm water.

● Specification

0.25g * 160 Softgels/Bottle.

Multi-vitamin & Mineral tablets (Prenatal)

- **Targeting groups:**

Adults or prenatal women requiring multivitamin and mineral supplementation.

- **Functions**

Mineral and vitamin supplementation.

- **Advantages**

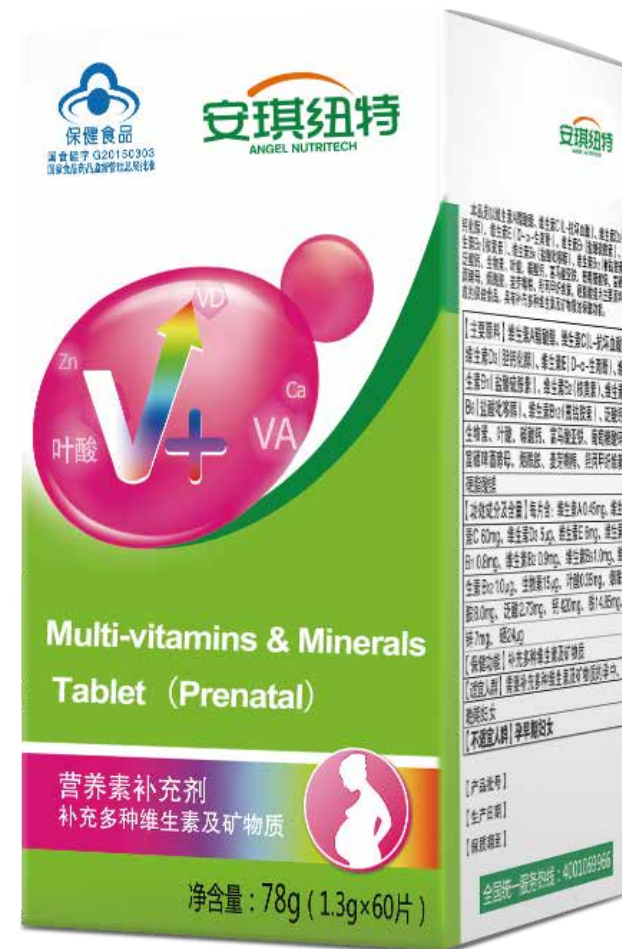

1. Vitamins and minerals come from DSM;
2. Supplementation of 16 nutrients at a time.

- **How to use**

Take 1 tablet per day.

- **Specification**

1.3g * 60 Tablets/Box.

Iron & Folic acid tablet (Prenatal)

● Targeting groups:

1. Megaerythrocytic anemia in pregnant women;
2. Fetal neural tube malformation;
3. Iron deficiency anemia. It is prone to low immunity, anemia, fainting, abortion, premature delivery, postpartum depression, low birth weight, intrauterine fetal death and neonatal death.

● Functions

1. Prevent anemia in pregnant women;
2. Prevent fetal malformation.

● Advantages

1. Selecting iron gluconate as iron agent is safer and better absorbed;
2. Collaborate folic acid scientifically and the dosage is designed for pregnant women.

● How to use

Take 1 tablet per day.

● Specification

0.3g * 60 Tablets/Box.

Acerola Cherry Vitamin C tablet

● Targeting groups:

1. Poor immunity, susceptible to disease and infection;
2. Gum bleeding;
3. Infection of oral ulcer;
4. Scurvy in severe cases.

● Functions

Vitamin C supplementation.

● Advantages

1. Brazilian coniferous cherry powder, rich in natural VC;
2. In addition to natural VC, it also contains natural active physiological ingredients such as bioflavonoids, doubling nutrition;
3. Taste good.

● How to use

Take 2 tablets once a day.

● Specification

1g * 60 Tablets/Bottle.

Probiotics (Prenatal)

● Targeting groups:

1. Urinary tract infection and vaginitis during pregnancy.
2. Urogenital tract infection in pregnant women
3. Constipation in Late Pregnancy

● Functions

1. Balance the vaginal flora to lay the foundation of healthy breeding;
2. Relieve female bacterial urinary tract infection and bacterial vaginitis, and enhance the effect of antifungal drugs;

● Advantages

1. Take care of women's privacy health and take it at ease during pregnancy.
2. 7.5 billion bacteria per bag to inhibit harmful vaginal

● How to use

1 to 2 bags a day. After meals, it can be eaten dry or flushed with warm water below 40 degrees.

● Specification

2g*30 Bags/Box

Yeast Protein Powder (Prenatal)

- **Targeting groups:**

Vitamin A deficiency, xerophthalmia, visual fatigue, growth retardation and poor immunity;

- **Functions**

Influenza susceptibility, Anemia, Fetal growth and dysplasia, Pregnancy striae and edema, Lactation with little milk and poor quality, Postpartum wound and body recovery is slow and hair loss.

- **Advantages**

1. German imported whey protein & Dupont non-GM soybean plant protein & French pea protein & Angel yeast protein (triple protein complementary, good absorption);
2. Rich in calcium, iron, VC, VE and other vitamins and minerals;
3. Special addition of Angel patent yeast glucan;
4. Fructo-oligosaccharide, DHA and walnut peptide were added.

- **How to use**

1-2 times a day, about 2 spoonfuls each time (can be increased or decreased according to the specific situation), breakfast and evening meals, flush with warm water below 40 degrees, or add milk powder, porridge and other foods to eat.

- **Specification**

450g

L-Carnitine & Dietary fiber powder

● Targeting groups:

1. Obesity and overweight;
2. Constipation and difficulty in defecation;
3. Endocrine dysfunction.

● Functions

1. Assist to lose weight;
2. Improve constipation and defecation;
3. Enhance intestinal epithelial cell immunity;
4. Detoxification and beauty preservation.

● Advantages

1. Switzerland LONZA L-carnitine, the world's leading supplier;
2. Japanese Matsushita Patent Water Soluble Dietary Fiber FB-2.

● How to use

Take 1-2 bags per day after mixing warm water.

● Specification

8g*16 Bags/Box.

Collagen Powder

● Targeting groups:

Dry, dull skin, Wrinkle, Skin laxity, Cracking and rough nail.

● Functions

1. Increase skin elasticity;
2. Promoting nail growth and improving nail quality;
3. Promoting wound healing;
4. Anti-cellulite-orange peel tissue, reduce the undulation of skin waveform and increase the density of dermis;

● Advantages

1. Excellent source: Professional Collagen Imported from Germany;
2. Good Absorption: Small Molecular Peptides is easy to be absorbed;
3. Excellent effect: a number of clinical trials, the effect is obvious;
4. Excellent formula: add imported Brazilian natural coniferous cherry, natural VC to promote collagen absorption and synthesis.

● How to use

Take 1 bag per day.

● Specification

6g * 15 Bags/Box.

KIDS SUPPLEMENT

The nutrient-correlated malnutrition during infant and childhood mainly reflects in the lack of protein, calcium, iron, zinc, vitamin A & D and unsaturated fatty acid. The improvement of children nutrition is the goal for sustainable development in United Nations and also the mission & responsibility of infant industry.

Based on the advantages of specialties, ingredients and manufacture, Angel-Nutritech developed powder, granules, tablets, drops and other forms of nutritional supplements and functional products for children on different ages, contributing to the healthy growth of children.

Milk Minerals Tablet

● Targeting groups:

1. Growth retardation;
2. Teeth grow slowly;
3. Rickets and Osteomalacia;
4. Osteoporosis;
5. Hypocalcaemia (tetany);
6. Baby who has the ability to chew.

● Functions

Calcium supplement.

● Advantages

1. High quality mineral salts imported from France;
2. The calcium is extracted from milk, safe and natural;
3. The ratio of calcium and phosphorus is in line with the human body, easily absorbed.

● How to use

Take 1-2 tablets, 1-2 times per day.

● Specification

1.0g/Tablet.

Milk Minerals Gummy

● Targeting groups:

1. Growth retardation;
2. Teeth grow slowly;
3. Rickets and Osteomalacia;
4. Osteoporosis;
5. Hypocalcaemia (tetany);
6. Baby who has the ability to chew.

● Functions

Calcium supplement.

● Advantages

1. High quality mineral salts imported from France;
2. The calcium content per serving (5 granules) is approximately equal to 250ml milk.

● How to use

5 gummies per serving, 1 serving per day.

● Specification

3.0g * 5 gummies * 10 bags.

Zinc Citrate Granule

● Targeting groups:

Hair is yellow, Night sweating, Poor appetite, picky eater, Short and small, thin and weak, Sensitive to the cold, Inattention, hyperactivity, Eczema.

● Functions

1. Improve appetite;
2. Enhance immunity;
3. Promote growth;
4. Improve the hair.

● Advantages

1. Organic zinc, good absorption, high safety, no stimulation to intestines and stomach, no irritation;
2. Specially added taurine which is beneficial to brain development.

● How to use

1-2 bags each time, 3 times a day, swallow with warm water with the meal.

● Specification

3g * 30 Bags.

Iron Granule

● Targeting groups:

1. Weight does not increase caused by anemia caused and gastrointestinal malabsorption;
2. Poor immunity;
3. Affect the mental development.

● Functions

1. Improve iron deficiency anemia;
2. Essential nutrients of the brain development;
3. Promote the growth and development;
4. To maintain the immunity.

● Advantages

1. Chelate iron without irontaste, the tongue would not be black after drank;
2. Four components synergies to promote the absorption of iron;
3. Sweet and sour, good in texture.

● How to use

1 bag each time, 2-3 times a day, Swallow with warm water.

● Specification

4g * 25 Bags/Box.

Lactoferrin & Whey Protein Powder

● Targeting groups:

Upper respiratory infection (URI), diarrhea, iron deficiency anemia, Pregnant women, lactating mothers and babies.

● Functions

1. Prevents and fights colds;
2. Lactoferrin can improve intestinal mucosal structure and promote intestinal development;
3. Improves intestinal flora.

● Advantages

1. Good ingredients and formula

Good raw materials: select the global high-quality milk suppliers to ensure the quality of raw materials;

Good formula: lactoferrin & whey protein

2. Enough content, good effect

Each bag contains 130 mg of lactoferrin and 243 mg of whey protein.

● How to use

Two times a day, one bag at a time, washed with warm water, can be added to milk, juice, rice paste and other foods to eat.

● Specification

1.0g/Bag, 45 Bags/Can

Probiotics Powder (General)

● Targeting groups:

1. Decreased immunity,
2. susceptibility to colds, cough and fever,
3. Poor intestinal function, colic, flatulence and vomiting.

● Functions

1. Improving immunity;
2. Preventing upper respiratory diseases such as colds;
3. Improving intestinal health.

● Advantages

1. Lactobacillus rhamnosus LGG & Lactobifidobacterium Dupont Bi-07 (Biprobiotics, synergistic effect is more significant);
2. Adding fructo-oligosaccharides.

● How to use

1 bag per day, after meals, can be eaten dry. Infants and young children are advised to flush with warm water below 40 degrees. Long-term use is recommended.

● Specification

1g * 30 Bags/Box.

Probiotics Powder (After using Antibiotic)

- **Targeting groups:**

Antibiotic diarrhea, Antibiotics kill beneficial intestinal bacteria, Abdominal pain, nausea, etc.

- **Functions**

1. Improve immunity and fight diseases;
2. Preventing and alleviating antibiotic-related diarrhea;

- **Advantages**

1. Excellent strain: All of them are edible probiotics for infants and young children, with clear effect, safety and reliability;
2. Number of bacteria: 7 billion active bifidobacteria were added to each bag.

- **How to use**

Take 1-2 bags of antibiotics every day after eating antibiotic 2 hours. Suggest taking antibiotics continuously for not less than 2 weeks. Infants and young children are advised to flush them with warm water below 40 degrees.

- **Specification**

1g * 30 Bags.

Probiotics Powder (Anti-Allergic)

- **Targeting groups**

Eczema of unknown origin, Food allergy, Allergic rhinitis, Babies with eczema, people who milk allergies and other food allergies, infants and adults with allergic rhinitis.

- **Functions**

1. Regulating immune balance to effectively combat infantile eczema (caused by allergens);
2. Relieving allergic symptoms (urticaria, food allergy, etc.).

- **How to use**

1-2 bags per day. After meals, they can be eaten dry or flushed with warm water below 40 degrees.

- **Specification**

2g*30 bags.

Yeast Boulardii Probiotics (Intestinal health)

● Targeting groups

1. Diarrhea caused by cold;
2. Diarrhea caused by eating unclean food by mistake;
3. Diarrhea caused by eating raw and cold food.

● Functions

Relieving diarrhea caused by various causes in infants and young children.

● Advantages

1. Patented strains of Chr Hansen, a century of research history;
2. The State Health and Planning Commission has approved the use, the effect has been confirmed, and the safety has been confirmed.

● How to use

One to two bags a day. After meals, flush them with warm water below 40 degrees. It is recommended to be taken for 2 weeks.

● Specification

2g * 30 Bags/Box.

DHA Algae Oil Softgel

● Targeting groups

Poor cognitive ability and inattention;

Children, pregnant women, breast-feeding mothers, infants and young children (can be cut capsules directly into the mouth).

● Functions

1. Nervous system development;
2. Brain intelligence development;
3. Visual cell development.

● Advantages

1. Extraction of pure natural marine microalgae;
2. Patent Technology, Crystallization at Low Temperature;
3. No Addition, Better Health;
- 4 Content Science, Suitable for Chinese Babies.

● How to use

Take orally or drip, preferably after meals. Take one capsule twice a day.below 40 degrees. It is recommended to be taken for 2 weeks.

● Specification

0.3g/Softgel.

Cod Liver Oil Softgel

- **Targeting groups**

Vitamin A deficiency, xerophthalmia, visual fatigue, growth retardation and poor immunity;

Infants with poor immunity, less outdoor activities, poor eyesight and rickets symptoms.

● Functions

1. Promoting vision development;
2. Bone and tooth development;
3. Promoting the immunity of respiratory tract and mucosa.

● Advantages

1. Choose Iceland's top cod liver oil, 100% of the original ecological North Atlantic cod liver oil, each drop only from fresh and high-quality cod liver, excellent quality;
2. Natural vitamin A, D, DHA and other nutrients in cod liver oil are easier to absorb than those synthesized artificially.

● How to use

One softgel per day.

● Specification

0.5g/Softgel.

Yeast Protein Powder (child)

● Targeting groups

1. Growth retardation;
2. Low resistance;
3. Oedema, malnutrition;
4. Hair is withered and yellow.

● Functions

1. Promote growth;
2. Enhance immunity;
3. Prevent malnutrition.

● Advantages

1. Rich in calcium, iron, zinc, VC, VE and other vitamins and minerals;
2. Specially added Angel yeast extract.

● How to use

1 to 2 times a day, every time about 2 spoonfuls, along with the meal in the morning and evening, mix with warm water under 40 centigrade degree, or add to drinks or meals like the milk, fruit juice, porridge and so on.

● Specification

300g

Hawthorn Yeast tablet

● Targeting groups

1. Anorexia and pickiness;
2. Abdominal pain and distension;
3. Dyspepsia;
4. Babies with anorexia, poor appetite and indigestion.

● Functions

Improve appetite and digestion.

● Advantages

1. From the classical prescription (Hawthorn Pill);
2. Food and medicine are of the same origin and are safer;
3. Combination of three effects (hawthorn & malt & yeast powder), good effect.

● How to use

Take 3 tablets twice a day.

● Specification

0.95g x 60 Tablets/Bottle.

Hawthorn yeast Granules

● Targeting groups

1. Anorexia and pickiness;
2. Abdominal pain and distension;
3. Dyspepsia;
4. Babies with anorexia, poor appetite and poor digestion (more suitable for infants).

● Functions

Improve appetite and digestion.

● Advantages

1. From the classical prescription;
2. Food and medicine are of the same origin and are safer;
3. Patented Biological Zinc, Easy to Absorb.

● How to use

Once a day, 1 bag a day.

● Specification

3g * 20 Bags/Box.

Zinc Yeast Tablet

● Targeting groups

1. Picky eating and anorexia;
2. Heterophilia;
3. Short stature and yellowish hair;
4. Mental retardation;
5. Immunity decline;
6. Wounds are not easy to heal;
7. Susceptible to oral ulcer.

● Functions

Zinc supplement.

● Advantages

1. Angel Patent Yeast Zinc F1004;
2. Vitamin C and probiotics are specially added;
3. A variety of fruit flavor, baby love to eat.

● How to use

2 Tablets twice a day (increase or decrease according to specific circumstances).

● Specification

60 Tablets/Bottle.

Zinc Yeast Gummy

● Targeting groups

1. Anorexia;
2. Allotriophagy;
3. Short stature, thin;
4. Mental retardation;
5. Decline of immunity;
6. Difficult wound healing.

● Functions

It can supplement bio-zinc.

● Advantages

1. Angel Patent Zinc-rich Yeast Extract- F1004;
2. The galacto-oligosaccharide and tuckahoe powder plays a synergistic role with biological zinc;
3. Independent packaging, convenient and hygienic.

● How to use

Take 1 gummy per time per day (Adults can increase their consumption according to specific circumstances).

● Specification

5 Gummies/Bag, 150g/box.

Hawthorn Yeast Granules

● Targeting groups

1. Anorexia and pickiness;
2. Abdominal pain and distension;
3. Dyspepsia.

● Functions

Improve appetite and digestion.

● Advantages

1. From the classical prescription ;
2. Food and medicine are of the same origin and are safer;
3. Patented Biological Zinc, Easy to Absorb.

● How to use

Once a day, 1 bag a day.

● Specification

3g * 20 Bags/Box.

ADULTS SUPPLEMENT

The fine processing of food, irrational way of cooking, drinking, binge eating and other living habits will result in the lack of nutrition in adults. In addition, due to the modern tense life, sedentary, lack of exercise, staying up late, high pressure and other factors will further lead to a series of subhealth state, such as fatigue, constipation, insomnia, immunity decline and so on. Meanwhile the morbidity of various metabolic chronic diseases, such as obesity, diabetes, cardiovascular disease, is rising year by year.

Based on the different subhealth symptoms, cooperating with the high quality raw material suppliers in the world and adopting advanced production process, Angel Nutritech generates various functional products for preventing and defending different diseases.

No	Product name	Form	Key benefits
1	Ca & Mg & Vitamin D	Tablet	Bone health
2	Ca & Vitamin D	Softgel	Bone health

Ca & Mg & VD Tablet

● Targeting groups

1. Low back pain, limb numbness and muscle spasm;
2. Osteomalacia dystocia;
3. Osteoporosis after postpartum;
4. Cramps and joint pain;
5. Loosening of the teeth after postpartum;
6. Pool sleeping (dreaminess, difficulty falling asleep, insomnia).

● Functions

Supplement of calcium, magnesium and vitamin D.

● Advantages

1. Calcium, magnesium and vitamin D together has better effect;
2. High content, less dosage, easy to take;
3. Pregnant women and wet nurse are edible.

● How to use

One tablet each time, 2 times a day, Swallow with water.

● Specification

1.2g * 90 Tablets/Box.

Ca & Vitamin D Softgel

- **Targeting groups**

Rickets; Osteomalacia; Osteoporosis.

- **Functions**

1. Calcium supplementation;
2. Vitamin D3 supplementation;
3. Maintain normal skeletal function and health.

- **Advantages**

1. Ultrafine Calcium Carbonate, Very Low Fineness;
2. Good absorption of liquid calcium;
3. Scientific formula, moderate vitamin D3 content;
4. Take one capsule a day for convenience.

- **How to use**

Take 1 softgel per day, oral administration.

- **Specification**

1.2g * 120 Softgels/Box.

Complete Vitamin B Table

- **Targeting groups**

1. beriberi;
2. neurodermatitis;
3. psoriasis;
4. megaloblastic anemia.

- **Functions**

B vitamin supplementation.

- **Advantages**

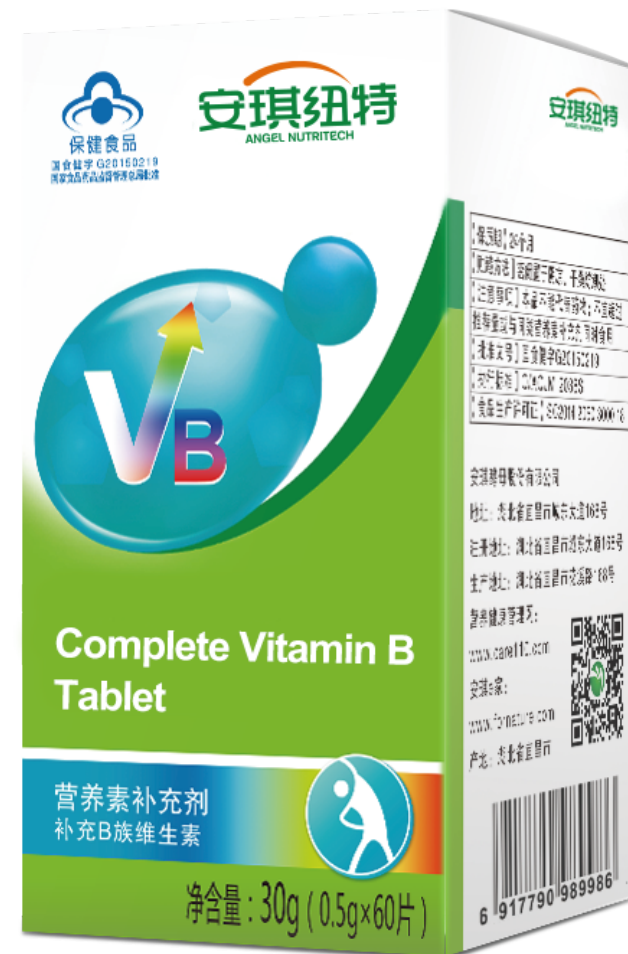

1. The B group vitamin raw material is from DSM and BASf;
2. Seven B vitamins are supplemented at a time, which is more in line with human needs.

- **How to use**

Take 1 tablet per day.

- **Specification**

0.5g * 60 Tablets/Box.

Probiotics (Digestion)

- **Targeting symptoms**

Hard and dry stool, difficult to defecate; Fewer times of defecation.

- **Functions**

Regulate intestinal flora balance, promote intestinal peristalsis and alleviate constipation.

- **Advantages**

1. Star strain. Population studies confirm that it can effectively alleviate constipation;
2. Combination of multiple strains with more than 20 billion live bacteria added to each bag;
3. Dual dietary fiber to promote intestinal peristalsis;
4. Double probiotics significantly promote the proliferation of intestinal beneficial bacteria.

- **How to use**

1-2 bags per day, mix in milk powder.

- **Specification**

2g * 30 Bags/Box.

Propolis Softgel

- **Targeting groups**

1. Poor immunity;
2. Susceptible;
3. Poor resistance.

- **Functions**

Strengthen the immune system.

- **Advantages**

1. The quality of the propolis meets requirements of the Pharmacopoeia (2015 edition), quality is guaranteed;
2. Using the technique of frozen and cryogenic comminution, is more easily to be absorbed.

- **How to use**

2 Softgels a time, 1 time per day.

- **Specification**

0.8g * 60 Softgels/Box.

Melatonin & Vitamin B6 Tablet

● Targeting groups

Insomnia, trouble falling asleep, poor sleeping quality, dysphoria and dream more.

● Functions

Improve sleep quality, calm nerves, improve mood, relieve stress.

● Advantages

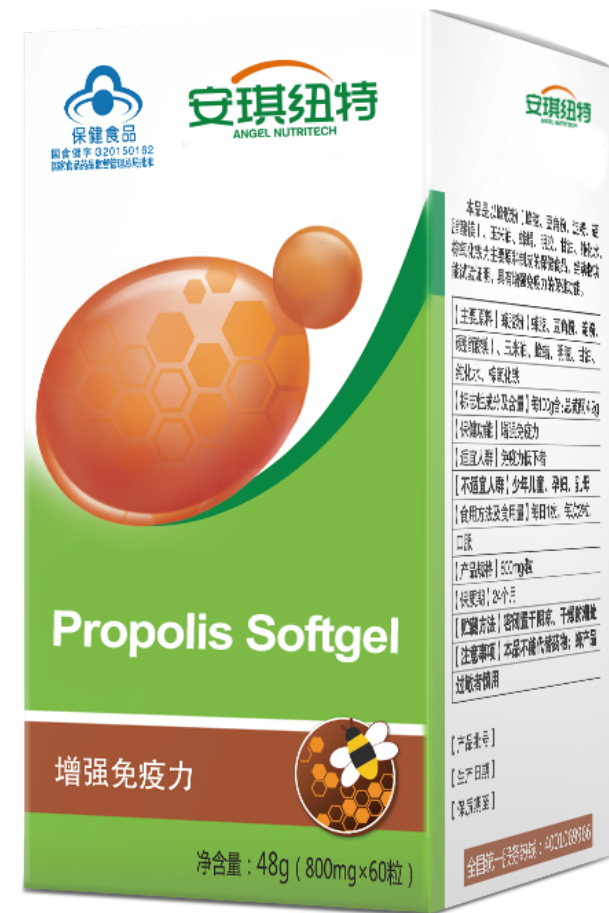

1. Melatonin and B6 together have synergistic effect;
2. High content of efficacy components, the effect is obvious.

● How to use

1 tablet a time, 1 time a day, take orally.

● Specification

0.5g * 60 Softgels/Box.

Vitamin E & Coenzyme Q10 Softgel

● Targeting groups

1. Pulmonary infection;
2. Carditis;
3. Cardiac arrest.

● Functions

1. Immune enhancement;
2. Relieving physical fatigue.

● Advantages

1. The Vitamin E is natural;
2. Coenzyme Q10 is refined by microbial culture, extraction and concentration, which is safer.

● How to use

1 softgel, 1 time a day, swallow with warm water.

● Specification

0.5g * 60 Softgels/Box.

Compound Whey Protein Powder (Sport)

- **Targeting groups**

Less muscle mass, strength and endurance; Double the exercise, the little effect; After exercise, the resistance decrease, and easy to catch a cold.

- **Functions**

Offer protein synthesis that muscles need, improve the effect of exercise; Adding yeast beta-glucan, can enhance immunity, improve body's resistance in "window period" after exercise.

- **Advantages**

1. High protein content, without excess carbohydrates, suitable for all sports people;
2. Specifically add Angel yeast beta-glucan.

- **Specification**

900g

Maca & Zinc Tablet

● Targeting groups

1. Low immunity;
2. Poor energy and fatigue;
3. Male sexual dysfunction.

● Functions

1. Enhance immunity;
2. Improve physical fatigue;
3. Enhance male vitality.

● Advantages

1. Maca powder imported from Peru;
2. Angel patented zinc-rich yeast extract, rich in zinc and amino acids;
3. Soft taste, not bitter and astringent.

● How to use

Take 2 tablets twice a day.

● Specification

0.8g * 90 Tablets/Bottle.

Fruit & Dietary Fiber Powder

- **Targeting groups**

1. Hyperglycemia;
2. Hyperlipidemia;
3. Obesity;
4. Constipation.

- **Functions**

Regulate intestinal tract and improve constipation.

- **Advantages**

1. The main dietary fibers are imported from abroad;
2. Diversified sources of dietary fiber.

- **How to use**

Take 1 bag per day.

- **Specification**

10g *15 Bags/Box.

Instant Yeast Powder

● Targeting groups

1. Middle aged and old people;
2. Low immunity people;
3. Frequent drinkers;
4. Gastrointestinal dysfunction;
5. Subhealthy population and patients with chronic diseases.

● Functions

Providing balanced nutrition;
Improving physical function.

● Advantages

Nutrition is abundant;
It tastes good, like cheese.

● How to use

Take 10g once a day; Take it with about 150 ml warm boiled water or milk.

● Specification

300g/Bottle.

Yeast Protein Powder

● Targeting groups

1. Malnutrition;
2. Fatigue and weight loss;
3. Immune deficiency;
4. Mental retardation.

● Functions

1. Growth-promoting;
2. Improve physical function;
3. Immune enhancement.

● Advantages

1. Angel Patent Zinc-rich Yeast Extract- F1004;
2. Organic zinc, higher absorption rate and less irritation;
3. 2.4 mg zinc/bag, the zinc content is more than the other zinc tablet products in the market.

● How to use

Take 1 bag twice a day.

● Specification

500 g/Can.

Yeast Zinc Capsule

● Targeting groups

1. Anorexia;
2. Allotriophagy;
3. Short stature, thin;
4. Mental retardation;
5. Decline of immunity;
6. Difficult wound healing;
7. Dysfunction of digestive tract.

● Functions
